Education

SRM Institute of Science and Technology , B.Tech in Computer Science and Engineering	June 2022 – May 2026
• CGPA: 9.18/10.00	
Adarsh Sanskar Vidyalaya & JR. College , Pre-University Education	May 2022
• Percentage: 78.83%	
St. Vincent Pallotti School , Secondary Education	May 2020
• Percentage: 91%	

Experience

Software Developer Intern , LogicGoals System, Nagpur	Dec 2024 – Feb 2025
• Developed the company's official website with a responsive interface, scheduling and enquiry features, and integrated secure payment systems for client websites to enhance transaction reliability.	
• Designed and implemented intuitive UI components for multiple web projects, used tools like php, html, css, javascript.	

Publications

ANITA: Advanced Novel Integration of a Tiered Aggregator for Credit Card Fraud Detection	2025
Published in Springer Nature Singapore – Lecture Notes in Networks and Systems (LNNS), Vol. 1505, 2026 (Scopus Indexed). DOI: 10.1007/978-981-96-8687-2_27	
Cost-Aware Temporal Deep Learning for Remaining Useful Life Risk Classification in Heavy-Duty Vehicles	2026
Accepted at ICCMC 2026 – IEEE International Conference on Computing Methodologies and Communication. To be published in IEEE Xplore Conference Proceedings.	

Projects

Advanced Novel Integration of a Tiered Aggregator for Fraud Detection	github.com
• Developed a stacked ensemble machine learning model for fraudulent credit card transaction detection, addressing class imbalance without oversampling for a robust fraud detection system.	
• Utilized: Python, Scikit-learn, XGBoost, NumPy, SciPy, Pandas, Matplotlib, PCA, StandardScaler.	
AutoSense	github.com
• Designed and developed AutoSense, an AI-powered predictive maintenance platform for EVs, normal cars, and heavy-duty trucks, enabling Remaining Useful Life (RUL) prediction and maintenance risk classification using deep learning models.	
• Utilized: React.js, Vite, Tailwind CSS, Framer Motion, Recharts, FastAPI, MongoDB, JWT Authentication, PyTorch, Scikit-learn, XGBoost, LightGBM, CatBoost.	
Study Notion	github.com
• Designed and developed Study Notion, a cloud-based e-commerce platform for e-learning, enabling students to access and purchase online courses.	
• Utilized: Aws EC2, React.js, Docker, MongoDB, Razorpay API.	

Technical Skills

Languages: Java, Python, C++.
Tools: Mern Stack, ServiceNow, Aws.

Global Certification

Nptel: Introduction to Machine Learning.
ServiceNow: Certified System Administrator.
ServiceNow: Certified Application Developer.
GitHub: GitHub Foundations.

Awards & Achievements

Best Project Award – Techknow 2022-2023	April 2023
Department of Physics and Nanotechnology, SRM Institute of Science and Technology (SRMIST) Awarded for presenting and demonstrating the project "Weather Station" at Techknow 2023, held from April 24-28, 2023	

Positions Of Responsibility

Additional Information

Soft skills: Problem Solving, Networking, Communication Skills, Teamwork, Leadership, Adaptability, Active Learner.
Interests: E-Sports, Trekking, Travelling.
